PROFILE

Master of Information Technology student at Monash University with experience in full-stack development, frontend design, system architecture and design, data analytics, and cloud technologies. Strong problem-solving skills with an interest in building practical technical solutions. Seeking opportunities in DevOps or software engineering.

Interests: Software development, full-stack development and cloud technologies.

TECHNICAL SKILLS

Programming: Python, JavaScript, TypeScript, C#, Java, R, C++
Frontend: React, Next.js, Vue.js, HTML, CSS
Backend and APIs: FastAPI, REST APIs, C# Web API
Databases: PostgreSQL, Microsoft SQL Server, MySQL
Cloud: AWS, Google Cloud Platform
Development tools: Git, GitHub, Vercel

WORK EXPERIENCE

IT Specialist | Dena Laboratory

Yasuj, Iran | Jan 2023 - Feb 2025

- Contributed to an online patient laboratory-results portal using C#, web APIs, Microsoft SQL Server and React as part of a development team.
- Supported users after rollout, troubleshooting application issues and resolving day-to-day operational requests.
- Provided hardware and software support, maintained the website and assisted end users.

IT Department Intern | Shiraz University of Medical Sciences

Shiraz, Iran | Jun - Sep 2022

- Contributed to a web-based course registration system using C#, web APIs, Microsoft SQL Server and React.
- Assisted with internal network administration and supported students during course registration.

IT Support Intern | Dena Laboratory

Yasuj, Iran | Jul - Oct 2021

- Assisted with computer maintenance, website updates and routine IT troubleshooting.
- Worked alongside the IT team to learn the organisation's systems and internal network operations.

EDUCATION

Master of Information Technology

Monash University | Melbourne, Australia | Feb 2025 - Dec 2026

Capstone project: PathFolio - career guidance and planning for young Australians.

Bachelor of Computer Engineering

Islamic Azad University | Shiraz, Iran | 2017 - 2022

Specialized in software engineering

PROJECTS

Full-stack development, system design and cloud technologies

PathFolio | Career navigation platform

2026

Next.js, TypeScript, Python, FastAPI, AWS

- Designed and implemented the frontend.
- Implemented the backend for several features.

Auditrax | AI-assisted compliance platform

2026

JavaScript, TypeScript, CSS, Python

- Contributed to system architecture, frontend design and backend development for an ISO 27001 audit-readiness platform.
- Designed workflows for centralised compliance evidence, control mapping and identifying audit-readiness gaps.
- Built interface and application components in a JavaScript and TypeScript codebase.

FaunaLens / Aussie EcoLens | Wildlife AI Assisted observation platform

2026

Next.js, TypeScript, Python, AWS, GCP

- Developed frontend features for media management, the image library, uploads, notifications and settings.
- Integrated authentication and implemented secure media uploads using AWS.
- Tested interfaces and integrated frontend flows with a team-built serverless AWS/GCP species-detection pipeline.

fauna-lens.vercel.app/login

SmartLoop | Sustainability Web Application

2026

Vue.js 3, JavaScript, Firebase, Cloud Firestore, Cloud Functions, Bootstrap

- Developed a sustainability platform to help users find recycling, reuse and repair services and discover community events.
- Implemented responsive interfaces, authentication, role-based access, routing, form validation, user/admin dashboards, event registration and ratings.
- Integrated Cloud Firestore and Firebase Cloud Functions to support database operations and server-side functionality.

ADDITIONAL PROJECTS

Online Course Selection and Registration | React.js

Developed a web application for students to select and manage courses, with admin tools for managing courses and students.

Android Calculator | Java

Built an Android application to perform basic mathematical calculations.

Online Food Ordering System Design | Rational Rose

Analysed and designed an online food ordering system, documenting system structure, workflows, and interactions using UML diagrams in Rational Rose.

PROFESSIONAL STRENGTHS

Problem solving / Analytical thinking / Teamwork / Adaptability / Initiative / Attention to detail

LANGUAGES

English: IELTS Overall 7 | Persian: Native
